

Wear Parts for Cane Shredder

Cane shredders are machines used in sugar cane mills to shred the sugar canes before the processing of sugar extraction. Choosing the wear parts with excellent abrasion and impact resistance and keeping them well-maintained is therefore essential in minimizing costly downtime throughout the mill crushing season.

With our field proven experience, Sunwill can supply the wear parts with following options:

- High strength steel with long life cycle

Hammer and Hammer Tips

- Removable hammer tips attached to shank to extend life cycle, easy to install and replace
- Hammers tips of bimetallic composite, deliver excellent abrasion resistance

Tungsten Carbide Welding Wires & Rod

- High quality, for maintenance team

* Customized sizes and shapes are available

SUNWILL CAST WITH VALUE

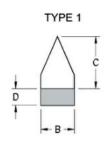

Knife Edges

Sunwill knife edges designed specially for the sugar industry, as a weld on wear resistant edge, are the most cost effective alternative to expensive, labor intensive hard facing methods.

Features

- Many different styles and sizes available and in stock
- · Ease of installing, welding and fixing
- Rotatable edges make both sides utilized, reducing maintenance costs
- · Increased productivity and shredding efficiency
